

October 2017 – September 2019

OBJECTIVES

The **CYCLE** project is intended to **create a set of tools that improve and develop adult trainers' competences that ensure the introduction of circular economy competences in adult training**, contributing to the creation of an attractive learning pathway for trainers and facing the existing gap in this area. The main target group are “non-vocational adult trainers” defined as those trainers & facilitators that provide any form of adult learning – formal and not formal – that is not directly linked to the labour market.

ACTIVITIES

The **CYCLE** project will elaborate a **pedagogical approach to the promotion of Circular Economy competence** in Adult Learning. Additionally, it will build an **on-line learning platform for adult trainers** to learn about competences for the circular economy, in order to improve their professional profiles and improve the training delivery.

ACR+ will mainly work for engagement of stakeholders and scaling up the dissemination impact of the project. ACR+ as Dissemination Strategy coordinator will approach its networks, in order to scale up the dissemination impact at EU level, aiming to establish and create new synergies with the related initiatives and platforms.

In addition, ACR+ will coordinate all the communication activities of the project, aiming at ensuring consistent and efficient communication, ensuring the visibility of project and programme, the dissemination of good practices and policies.
