PUBLIC PROCUREMENT OF
INNOVATION
FOR RESOURCE EFFICIENCY AND
WASTE TREATMENT

PPI Training

MODULE 1 – Introduction to PPI4waste

PPI training

21/12/2016

PPI4Waste

Under Work Programme “Climate action, environment, resource efficiency and raw materials”

One of the main focus areas of the “Climate action, environment, resource efficiency and raw materials Challenge” in Horizon 2020 is **waste**. In this sense, the main concern is to **support the transition towards a more circular economy**.

PPI4Waste aims to achieve resource efficiency, sustainable waste management and sustainable consumption throughout Europe by increasing innovative public procurement through networking, capacity building, and dissemination.

Main Objectives

Coordination and Support Action

- Overcome the fragmentation of the demand, reinforce early deployment for uptake of innovative solutions and deploy PPI on waste at larger scale
- Build capacities and competences across partners through the process of preparation activities for coordinated PPI.
- Improve public stakeholder's market knowledge on waste innovative solutions and define their targeted improvements.
- Promote public-private collaboration actions towards resource efficient products and services development to accelerate final access to end-users.
- Increase awareness on the benefit of the adoption of coordinated innovation-oriented procurement strategies.
- Assessment of a feasibility plan for coordinated cross-border PPI

Who is involved?

8 partners are working together under the PPI4Waste project:

- Andalusian Institute of Technology (IAT-Project coordinator)
- ICLEI
- Zagreb City Holding
- University of Zaragoza
- ACR+
- Mancomunidad del Sur (Madrid province)
- SP-Swedish Technical Research Institute
- Dutch Ministry for Infrastructure and Environment

An Expert Group composed of key experts at European level.

Areas of expertise include:

Waste management

Municipal waste policies

Innovation for municipal waste prevention and management

Public procurement of innovation practices

PPI4Waste in brief

Identify common needs within the public sector in Europe

Create an Interest Group and a Purchasing Community to exchange and collaborate on the topic of PPI4Waste

Implement capacity-building workshops to reinforce knowledge on PPI procedures

Dynamic case studies to prepare coordinated procurement of innovative solutions in waste management

Promote collaboration between the public and private sectors through market consultation

Identified common needs within the public sector in Europe

The methodology supports the identification of needs faced by contracting authorities in different countries, regions and cities in order to support them to describe and understand their situation and challenges regarding municipal waste management.
