Scaling Up Circular Economy Solutions: From Pilots to Replication

10:00 **Welcome and introduction**

10:10 **Setting the context for replication**

Replication success factors for circular economy support schemes and relevant DECISO results:

- Overview of the four DECISO pilots and their distinctive approaches
- Key challenges and success factors in circular economy implementation

10:20 **Pilot-replicator session 1: Hamburg's Pop-up Circular Hub**

Presentation of the circular hub model and its key exploitable elements to open on a discussion on replication roadmaps.

10:45 **Pilot-replicator session 2: Alentejo's circular agrifood ecosystem**

Presentation of the ecosystem mapping methodology and its key exploitable elements to open on a discussion on replication roadmaps.

11:10 **Pilot-replicator session 3: Northwest Germany's Disco project**

Presentation of the digital twin tool for water management and its key exploitable elements to open on a discussion on replication roadmaps.

11:35 **Pilot-replicator session 4: Western Macedonia's biomass initiative**

Presentation of the key exploitable elements to open on a discussion on replication roadmaps.

12:00 **What's next?**

Summary of key takeaways, common success factors and challenges
Timeline for follow-up actions

12:25 **Conclusion**
