

April 2016 – March 2021

## OBJECTIVES

The INTHERWASTE project “Interregional Environmental Integration of Waste Management in European Heritage Cities”, funded under the Interreg Europe Programme, **aims to foster the exchange of experience and policies for efficient and sustainable waste management in European Heritage Cities**. The project expects to:

- Contribute – through mutual capacity-building, policy learning and the drafting of action plans – to the environmental performance of waste management in EU cities.
- Improve the capacity of the staff of involved authorities to design and implement policies and measures in the waste field and governance in the same field.

The preservation of heritage and the management of significant amounts of waste make the observance of waste-related strategies of specific importance. In addition, visibility of Heritage Cities worldwide can help reduplicate experiences identified in many other cities.

## ACTIVITIES

As the advisory partner ACR+ is in charge of providing expertise to the partnership in the different stages of the project, helping to consolidate the knowledge base. ACR+ also organized a Capacity Building event to train partner cities representatives in the use of different waste monitoring tools for their management at city level (Pre-waste, Miniwaste, R4R, the EWWR Food Calculator and others).

In addition, ACR+ is coordinating the communication activities of the project, ensuring the visibility of the project and programme and the dissemination of good practices and policies. This included the launch of the INTHERWASTE twitter account: [@intherwaste](#); the maintenance of the [INTHERWASTE website](#); the creation and maintenance of a newsletter as well as other communication and dissemination activities.

In order to keep up with project progress, please follow [@intherwaste](#) on twitter to receive the latest updates and information and [subscribe to the newsletter](#)

## PARTNERS INVOLVED

The project coordinator is **SADECO** (Sanitation Cordoba, ES) and involves four other municipalities:

- **Krakow** (PL)
- **Porto** (PT)
- **Ibiza** (ES)
- **Tallinn** (EE)

**ACR+** is acting as the advisory partner on the project and providing expertise to the partnership, as well as coordinating the communication activities of the project.

*The INTHERWASTE project is funded under the European Regional Development Fund.*
