

FOOD & ORGANIC

Photo by Elaine Casap on Unsplash

Several European legislations and strategies, like the Farm to Fork strategy, address food and food waste aiming to make food systems more fair, healthy and environmentally friendly. Food production, consumption, and waste are strongly connected with many major environmental challenges: climate change, biodiversity loss, resources scarcity.

Various targets directly concern local and regional authorities:

- Food waste sorting obligation by end of 2023
- Food waste reduction targets to be set by end of 2023
- Other targets on reducing the use of fertilizer, or converting agricultural land under organic farming.

What can you do to get prepared to comply with upcoming legislations and support sustainable food systems in your territory?

Food loss and waste prevention

Hear about finished or ongoing projects linked to food loss and waste prevention

Webinar "Cooperation and Collaboration Network on Food Losses and Waste"

Discover 23 innovative solutions tackling food waste in the meat and fish, bread, and vegetables and prepared salads value chains

FOODRUS demonstration sites

Learn about the legal, economic and system barriers that produce food losses and food waste in our systems?

FOODRUS policy analysis study

Follow pilot territories investigating circular solutions for biowaste

The three Biocircularcities pilots

Get inspired by successful experiences

Biocircularcities 30 Good Practices

Engage with frontrunners cities and regions

HOOP Network of Cities and Regions

Food waste collection and treatment

Assess the performance of biowaste management options on your territory

Decision support tool for decentralised biowaste management on public procurement of innovation

Develop decentralised biowaste management systems

DECISIVE methodology for the planning of decentralised biowaste management

Learn from Navarre, Bayern and Flanders' experience in developing and implementing circular bioeconomy strategies

Report «The governance of circular bioeconomy - Practices and lessons learnt from European regions»

Hear experts' insights on fostering the urban circular bioeconomy across Europe
